

## Maths in Group 2 at International School Haarlem

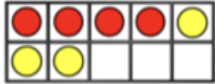

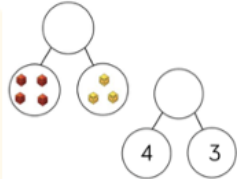

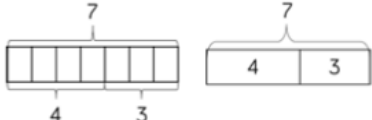

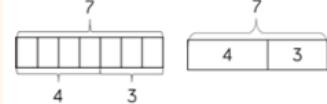

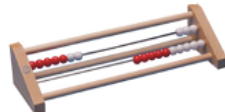

At International School Haarlem we aim to provide children with consistent and secure mathematical language, representations, and methods as they move up through the groups. These progress alongside their mathematical understanding and in combination with a range of concrete resources.

This document shows the National Curriculum goals alongside the mathematical language, representations, and methods the children are expected to have covered by *the end* of Group 2. In addition, it shows the concrete materials the children will use to support their learning and comprehension.
